Special Train To Calgary May 26 Is Probable

C.P.R. Propose Running Special Train for "Pass" to Calgary to See King and Queen—Excursion Rates—Large Contingent From Pass Towns Anticipated.

Disappointment came to several last week when it became known that the special train which they had been told was available had to remain to Calgary on May 26 to see the King and Queen was not to be had.

Mr. Taylor, local C.P.R. agent, revealed to the Journal that had been sent from the company's offices in Calgary. The company said that if it is favorable with the citizens of the Pass, they will run a special train on the morning of May 26 leaving Crows Nest Pass at 2:00 p.m., stopping at every station in the Pass en route to Calgary via Macleod and reaching the city at 3:30 p.m.

The rates would be \$4.30 for adults, \$2.15 for children between the ages of 12 and 16, and \$1.00 for children under 6 years would go free.

Mr. Taylor made it clear that the company only propose to run this special, and it is likely that the committee selected at last Friday's meeting will have a large contingent in the special, and it would have to distribute this equipment as evenly as possible.

Citizens Meeting Given Wrong Information

No Authority Given by Railway Co. to Quote Rate for Special Train to Calgary.

Last week information was given to a citizens' meeting in connection with a special train which it was proposed to run to see the king and queen to parents to Calgary to see the king and queen. On the basis of this information, a questionnaire was distributed to all the schools in the Pass. 300 adults signified their intention of going. The rate was based on the information that the train would cost a definite amount.

At a second meeting held to receive the replies, it was found that the individual supplying the information had no authority from the railway company to give it, resulting in confusion and disappointment.

A committee was appointed to ascertain if a special train could be secured, and possibly the result will be known by the time this appears in print.

H. MEYERHOFF EXonerated

Henry Meyerhoff, head of the Orient Shows, which has winter headquarters in Penticton, has been exonerated of the charges laid against him in Seattle some time ago. It will be recalled that the Penticton man was arrested in Seattle by federal agents and charged with connection with old charges, the re-arrest being on a technicality.

The former Hackensack, N.J., bank president was exonerated December 20, 1938, of failing to make payment on a \$1,000 fine within six months, which formed part of an old sentence. The charges, six years old, were in connection with his failure to pay his debts to the government.

A committee was appointed to ascertain if a special train could be secured, and possibly the result will be known by the time this appears in print.

Junk at a Premium

Iron and steel scrap, formerly considered junk, has within the last few years reached the front rank among the raw material on which the world's steel industry depends.

In the individual championship honours, Jerry Field won the cup for the highest scoring average, having a point score of 170. Heles Yusis won the prize for highest score with 31.

Personnel of the teams were: Lucky Strikes—Miss Morris, Mrs. Soderstrom, Elsie Fenton, B. Chester, Barbara Pietraszko; (Margaret Bell, captain, was absent through sickness, Miss Morris taking her place). Easy Marks—Mary Krypian (captain), Helen Newton, Carrie Sapeta, Violet Sapsita, Helen Newton.

"LUCKY STRIKES" WOMEN'S BOWLING CHAMPIONS

In a hectic play-off series for the women's bowling championship at the Canadian Bowling Alley, the Lucky Strikes defeated the Easy Marks two games to one in a three-game series. Cups were awarded the winners.

In the individual championship honours, Jerry Field won the cup for the highest scoring average, having a point score of 170. Heles Yusis won the prize for highest score with 31.

Personnel of the teams were: Lucky

Strikes—Miss Morris, Mrs. Soderstrom, Elsie Fenton, B. Chester, Barbara Pietraszko; (Margaret Bell, captain, was absent through sickness, Miss Morris taking her place). Easy Marks—Mary Krypian (captain), Helen Newton, Carrie Sapeta, Violet Sapsita, Helen Newton.

ASSETS

The greatest asset of any nation is the spirit of its people—the will to win and the courage to work. By that same token, the greatest danger that menaces a nation is the breakdown of that spirit, turning human beings into something resembling sheep.

News From The Alberta Legislature

Edmonton, March 13.—The serious business of the legislature was scheduled, at last, for discussion beginning this week, the budget debate having ended Friday night after another nine days of speech-making. The actual estimates and the legislation were ready for consideration at last.

Details of new taxation and of the government's new ideas for invading the field of private business were being awaited anxiously by the taxpayers who must pay the bills even though deprived of business, and by the whole public who are being looked upon as customers.

The system of marketing boards which the government announced in one bill is to extend to any line of business or industry which the government wants to invade or regulate or control absolutely, in the guise of reducing to consumers and at the same time, by some other method or other, maintaining prices paid to producers. Mass buying in the aim and whether the government, through a system of marketing boards and costly administration, can overcome governmental reputation for small business ability to the point of doing business more efficiently than can men trained in business for many years is questioned. The marketing board bill contains the provision, however, that the board can draw money from the provincial treasury when needed.

The other new venture of the government is to be in fire insurance through establishment of a government commission which like a private company is to undertake to insure clients against fire losses. Pending announcement of the bill's details, there was no indication whether the rates are to be higher or lower than those of companies now operating, although the purpose was declared to be lower rates.

It was not explained, either, how the government intends to set up a fund, starting from scratch, which will be adequate to pay claims of such policy-holders as it obtains. The government alleged that in Alberta the fire claims in one year amounted to only 5 per cent of the premiums collected, and said that the "gross profit" to insurance companies therefore must be 65 per cent. But insurance men pointed out that all the costly protection and investigation needed to keep down fire losses also

continuing to extend to the treasury branches what co-operation the government asks, without passing judgment on their security.

W. N. Chant, former minister of agriculture, and now independent M. L. A. for Camrose, who was in the government during the ill-fated scrip experiment, advised in the legislature the other day where the government intended to get the real money to keep the treasury branches in operation and to keep the "vouchers" in good standing. He was not answered.

Here is an item from The Blairmore Enterprise of November 16, 1917:

"Monday a Coleman auto put to sleep a pet dog belonging to an Indian at the bridge, and at night a line-up of about 20 Indians guarded the highway looking out for the guilty party. We understand that most of his possible fate was sealed to death by the Indians, and in order to reach home without suffering inflictions from knives, batte axes etc., the Colemanite had to take a northern route, reaching home in the early hours of Tuesday morning. Monday night the occupants of every car passing were obliged to 'hands up' until the pioneers satisfied themselfs to their satisfaction."

Here's an ad of December 14, 1917, from the Enterprise:

"Make Money Easy!

"If you would do so invest in town lots in the most substantially-founded lots in the business community in the Crows Nest Pass. THAT PLACE IS COLEMAN."

West Canadian Collieries was advertising High Grade Domestic Lump Coal \$6.50 delivered; Steam \$5.50 delivered. Judging from these prices, coal still costs the customer the same today as over 21 years ago.

must be paid out of premiums, in addition to ordinary administration expenses. In any 15-year period such as must be considered for accurate figures, they said, the real profit of all the companies throughout the dominion never has been higher than 7½ per cent.

In announcing the marketing board scheme and the insurance idea, the government candidly connected both with the "treasury branch" or "credit house" idea, indicating that it is hoped to finance the projects through the public's acceptance of the "treasury vouchers" instead of cash and with the backing of taxpayers' funds in the provincial treasury. There has been no claim advanced so far that either scheme is illegal, but it has been pointed out that the history of government intervention in private business in Alberta has not been happy, and that the attempt to operate hail insurance resulted in sharply increased rates and in a financial loss so heavy that the scheme had to be dropped.

Additional taxation of companies operating in Alberta, to help finance the government's adventures, is being provided for in the legislation now being brought down. Corporations are to pay even more than in the past, and the levies on them already have risen steeply during the past three years, as they did on individual taxpayers in the smaller income brackets. Since such companies cannot print "treasury vouchers," they must pass the taxes on to their customers in some measure.

The "temporary" additional tax on banks is to be continued; it has amounted to \$105,000 a year recently, in addition to the regular bank taxes through which the province collects about \$250,000, as well as the share of heavy municipal and federal taxation. The banks, however, are continuing to extend to the treasury branches what co-operation the government asks, without passing judgment on their security.

W. N. Chant, former minister of agriculture, and now independent M. L. A. for Camrose, who was in the government during the ill-fated scrip experiment, advised in the legislature the other day where the government intended to get the real money to keep the treasury branches in operation and to keep the "vouchers" in good standing. He was not answered.

Eastern Star Grand Matron Visits Coleman

Grand Matron Sister Harwood, of the Grand Chapter of Alberta, made her annual visit to Minerva Chapter of the Order of the Eastern Star at Coleman on Wednesday evening.

Two new candidates, Mrs. A. B. Westworth and Mrs. R. Davidson, were conducted into the lodge in the presence of the grand matron. Following the meeting, a social evening was spent by the members, guests being present from the lodges at MacLeod, Fincher Creek and Hillcrest. Mrs. Harwood was presented with a beautifully framed picture of Crows Nest mountain by the local lodge.

On this Thursday evening the grand matron will attend the Hillcrest Lodge and will be accompanied by Coleman by several local members.

CALGARY OIL FIRM TO DONATE CURLING TROPHY

The bontspiel between Coleman, Bellevue and Blairmore each year bids fair to rival the Crows Nest Pass bontspiel which is recognized the number one 'spiel in these parts.

At Bellevue on Sunday evening two members of the Bellevue club enthusiastically announced that they had secured another cup to add to the Pontiac-Studebaker-Cobie trophies and that the donor, a prominent Calgary oil firm, was willing to support the trophy with a first prize.

Before final acceptance can be made the sanction of Coleman and Blairmore clubs must be secured and the question which will be raised by those clubs will be: Who is donating the second prize?

ST. PATRICK'S DANCE HIGH-LIGHT OF SOCIAL SEASON

St. Patrick's dance under the auspices of Coleman Elks will be the highlight of the social season, as handsome gentlemen and their colleagues, with laughing Irish eyes, gather on Friday evening at the community hall for an evening of fun and entertainment. Balloons and streamers will add to the gaiety as dancers swing to the hot rhythm of Arcadians' orchestra.

COUNCIL AND SCHOOL BOARD MET ON TUESDAY

A meeting between the town council and the school board was held on Tuesday evening to discuss the new assessment, which will go into effect this year. The school board will be adjourned to meet again on March 27.

After some discussion it was decided to adjourn the meeting until such time as the school board has received the government assessment for all properties in the school district which are outside the town limits.

The Modern Juggernaut

In a total of 242 accidents at highway crossings in Canada last year 96 persons lost their lives and 300 others were more or less severely injured, according to the annual report of the Board of Transport Commissioners for Canada recently tabled in the House of Commons and the Senate.

It is interesting to note that of the total 40 occurred at protected crossings entailing a loss of 14 lives and 42 injured, the remaining 202 had taken place at crossings devoid of any warning devices with a toll of 82 deaths and 258 injured.

Further information contained in a summary of the report issued to the press of the country reveals that of the total 242 highway crossing accidents, 155 occurred in the daytime and 92 at night. Further analysis shows that of this number 63 accidents with 13 persons killed and 91 injured were caused by motor vehicles running into the sides of trains, 22 of them in daylight and 41 at night, bringing death to 13 and injury to 91 more.

"The number of accidents at night," the summarized report adds, "would indicate that auto drivers are outrivalling their headlights, and are paying little or no attention to the provincial statutes governing the operation of autos when approaching and passing over highway crossings."

While this toll of life and limb and suffering at highway crossings is far too heavy and serious enough to warrant indictment of a large number of motorists on the grounds of both carelessness and, what is less excusable, recklessness, the official report for the preparation of the press summary has one consoling word for the public when he adds: "It is gratifying to note that in 1938 there were less crossing accidents and casualties than in any year since 1934."

The summarized report gives the Board of Transport Commissioners some credit for this reduction, at least by inference, by pointing out that there were 23 accidents less during the last six weeks of the year as compared with the same period of 1937, since a new order went into effect on October 15, 1938, lengthening the last blast of the whistle to be sounded by locomotives approaching public crossings.

Value Of Protective Devices

A summary of a report cannot be expected to contain all the information in the report itself or even all the highlights in the report, but one could wish that, on a subject of such importance to the public at large, it contained more data to enable one to draw more definite conclusions as to the trend in highways.

For instance, to appreciate the value of protective devices at highway crossings it would be important to know what percentage of the total number of such crossings are equipped with one or another of the various warning devices in use and how many are entirely unprotected, except perhaps with the ordinary "stop" sign, which appears to be almost entirely disregarded by the great majority of car drivers. The summary does not give this information but the unprotected crossings, especially in the west, probably far outnumber the protected crossings that the five to one ratio of the 1938 accident toll at the unprotected and protected crossings respectively. If this is the case, it can be reasonably assumed that gates, flash signals, electric bells, wigwags and watchmen are not responsible for much, if any, reduction in loss of life and injury at crossings thus equipped.

The very fact that the lengthening of a locomotive whistle blast on approaching a public crossing resulted in a marked decrease in highway crossing accidents towards the end of the year, assuming that the official's diagnosis of the cause of the reduction is correct, indicates that not all the blame for all of the accidents can be laid at the door of the careless or reckless motorist, or at least that the railways themselves, with or without instructions from the board, can reduce the hazards of these crossings.

Enforcement Needed

This, however, does not relieve the motorist of responsibility for taking every precaution to protect his own life and of his passengers. Apart from anything that may be pointed out in the report or its summary, it is common knowledge that there is far too much carelessness on the part of automobile and truck drivers on the highways and particularly at railway crossings and it would appear that penalties for non-observance of the ordinary prescribed precautions at these danger spots could with advantage be made more severe, particularly where recklessness is shown. Moreover, if these penalties were made sufficiently stiff to act as a deterrent and careful drivers would assume the role of policeman and report all infringements, thus ensuring enforcement of the law, a more substantial reduction in highway-crossing accidents might be expected to ensue.

It is quite evident that a number of these accidents are the result of recklessness, amounting to criminality, for no less than 23 of the accidents reported to the board, involving nine dead and 25 injured, occurred at crossings where bell and wigwag were operating, and even where gates were installed and in operation eight accidents occurred bringing death to two and injury to another half dozen.

Ceiling Of Rock Salt

Six and a half tons of rock salt form the ceiling of the Royal Pavilion at the New York World's Fair, noted British newspaper man, who said that he found a strong feeling of friendship toward Great Britain and he considered that the welcome there to the King and Queen will "be a demonstration to the world." It cannot be questioned that recent events have brought the two peoples more closely together than at any other period since the War of Independence. Bradford Expositor.

Feeling Of Friendship

After travelling in the United States for some weeks, Lord Kemsley, noted British newspaper man, said that he found a strong feeling of friendship toward Great Britain and he considered that the welcome there to the King and Queen will "be a demonstration to the world." It cannot be questioned that recent events have brought the two peoples more closely together than at any other period since the War of Independence. Bradford Expositor.

Snow packed on a wire network formed a giant refrigerator on Wrangell Island in the Arctic Ocean to preserve the frozen carcass of a prehistoric mammoth recently discovered there.

"Do you think a married woman ought to work for a living?" "Well, I don't see why she should go hungry just because she happens to have a husband."

Nine million pieces of linen are used annually by travellers on pullman cars.

Will Be Exciting Trip

Alberta Cowboy Indians Putting On Rodeo Show In Australia

A Canadian Indian village of eight towering tepees will be an attraction at the Easter exhibition and rodeo of the Royal Agricultural Society of New South Wales at Sydney, Australia.

Eight Alberta Indian cowboys, headed by Chief Joe Croyston, a tall Blackfoot tribesman, will compete in the rodeo and live in the village. The cowboys are the ace riders from the Blackfoot, Blood, Sarce and Stoney reserves.

For the long voyage to Australia the Indians embarked on the S.S. Niagara at Vancouver. They were not worried over the prospect of being seasick.

Used to the hurricane deck of a plunging bronk, Johnny Left Hand of the Stoneyes said:

"It can't be much worse than shooting a bucking horse."

The tribesmen from the plains prepared well for the journey. New tribal finery was made by the women on the reserves.

For formal wear aboard ship Chief Croyston will dress as befits his position as a chief and sergeant major with gold braid.

The Indians travel in dark lounge suits, but once at Sydney will wear their picturesque regalia of beaded buckskin and feathers.

With them go nearly half a ton of souvenirs, specimens of typical Indian crafts which will be sold in the exhibition village.

The souvenirs range all the way from buckskin suits, eagle-plumed head dresses, beaded belts, gloves and moccasins to relics of an age when bone and stone were used for weapons of war and the chase. There are stonemasons, bone knives, bowie bows with their complement of arrows, and cups and spoons made from mountain sheep horn.

The party is in the charge of Constable S. J. Lynch of the Royal Canadian Mounted Police.

He is a young man, combining the duties of representative of the department of Indian affairs with that of counsellor and guide for his Indian charges, few of whom have ever been outside the boundaries of Alberta.

Fiery, Itching Skin Gets Speedy Relief

Here is a clear, stainless, penetrating antiseptic now developed by chemists at Ithaca, N.Y., to relieve the pain of Eczema, Itching Face, and other skin troubles.

Not only does this great healing antibiotic oil promote rapid and healthy healing in the skin, but it is also a valuable insect repellent. It quickly relieves and heals skin eruptions, and instantly stops the eruptions of the same is true of Barber's Itch. (See illustration.)

You can obtain Moene's Emerald Oil (full strength) at any modern drug store.

Seaweed For Cattle Meal

New Zealand Is In Market For Canadian Product

Now comes the news that Canadian seaweed has been proved to be remarkably good for cattle meal, and far away, New Zealand has actually come into the market in a big way.

These farmers of New Zealand, some of whom descendants of the men who long ago built a ship and sailed to that country from Nova Scotia, know quite a lot about cattle and about dairying, and we know very well that when they ask for Canadian seaweed, made into meal, they are asking for something that will be a benefit to their already powerful and efficiently conducted industry of dairying.

Credit Goes To Parrot

Bird Scared Armed Bandits Away From Lunch Stand

A talkative parrot was credited with frightening away three armed bandits at a lonely roadside lunch stand in West Hill, a suburb of Toronto.

The trio escaped in a stolen automobile with \$36 and a quantity of tobacco.

A sum of money hidden in a bedroom was missed.

They were about to search drawers where the sum of money was hidden, when the parrot, whom the bandits did not see, shrieked "Hello, hello!"

The men dashed from the store and raced away.

How Women in Their 40's Can Attract Men

Here's good advice for a woman during her change (usually from 35 to 65), who fears she'll look old. She needn't. A diet of low fat, lots of pop, dizzy spells, upset nerves and moodiness are all part of the change. If you need a reliable "WOMAN'S TONIC" take Para-Sani. It is a special blend made especially for women. It helps Nature build up the body and mind. It gives energy vivacity to enjoy life and assist calming jittery nerves and those disturbing symptoms of the change.

Finkham's is WELL WORTH trying.

Once you sweeten your morning cereal with BEE HIVE Syrup you'll know how good cereal can taste.
TRY IT TOMORROW

Grenfell Of Labrador

Sir Wilfred Made First Visit Forty Seven Years Ago

Sir Wilfred Grenfell has passed his 74th birthday. It is 47 years ago since he set sail from England for the Labrador coast in the little ketch "Albert" to investigate for the Royal National Mission to Deep Sea Fishermen conditions among the fishermen there. He found no resident doctor along the whole thousand miles of coast. The government mail boat carried a doctor but the calls of this steamer at the little ports were brief and infrequent. During that first summer, 900 patients were treated, many for accidents which had occurred years back and left the victim disabled.

There was an intense interest in Canada. Now it is known throughout the world as "Grenfell of Labrador" or "The Labrador Doctor."

The intervening years have seen the establishment of a chain of little hospitals and nursing stations along the coast of northern Newfoundland and the Labrador. No patient is ever refused treatment at one of these hospitals through inability to pay, but each is expected to contribute according to his ability. The hardy, uncomplaining fishermen and women travel long distances to secure medical help. One old widow was hauled by dog team 70 miles for eye operation and taken back home by open boat in spring when the ice broke up, and this is an ordinary occurrence.

Sir Wilfred's heart is still on the coast and his home is still there but he does not go there today. His energy has necessarily been diverted to the essential executive work of writing, lecturing and elaborating new projects for development. He continually receives touching pleas for aid, poorly spelled but full of determination and spirit.

The figures are not completed for the 1938 crop contest, it is known that several of the winners have secured beet crops averaging 200 bushels per acre. The 1937 crop, entitling 158 growers to qualify since the start of the club, was 15% of the total number of beet farms.

Compared with 1935, the increased production of sugar in this year amounts to 34,000 bags of sugar, which is about 75% increase in production in three years. The problem of the Alberta sugar industry is, therefore, that of marketing in which sugar is a staple product. It will produce a fair return for growers, laborers and the factories.

The use of Alberta beet by-products such as molasses, Top Wett, Beet Pulp and Beet Molasses is enabling Southern Alberta to market 50,000 lambs and 10,000 head of cattle each year as a financial asset.

These factors of New Zealand's success are leading them to other districts, thereby providing winter occupation for feeders and retaining fertility for Alberta farms.

During the sugar beet operating season, there are approximately 1,000

Prefer Their Own Brand Eskimos Make Ice Cream Few People Would Enjoy

Father Bernard Hubbard, world famous as the Glacier priest, told a Detroit audience Eskimos of Alaska prefer their own brand of "ice cream" to any other dish. The recipe: To three quarts of seal oil, add two pounds of walrus blubber. Mix in two pounds of dried grass and one pound of tallow. Shovel in five quarts of snow and add herbs to taste. Blend the ingredients in an empty gasoline can at a 30-below zero temperature. This will serve ten persons, Father Hubbard said.

The moon always presents the same face to the earth, as is evident from the permanency of the various markings on her surface.

One out of every five persons killed in road accidents in England is a child under 15 years of age.

ACHING COLDS

Relieve Their DISTRESS This Easy, Quick Way!

Don't take chances. Rub on sooth-ing, warming Musterole. Relief quick and sure.

Musterole gets such fine results because it's NOT just a salve. It's a "counter-irritant"—soothing, warming, stimulating and penetrating. Used quickly in quickly in relieving local congestion and pain.

Used by millions for 20 years. Recommended by many doctors and nurses. Made in Canada, in three strengths: Regular Strength, Children's (mild), and Extra Strong. Approved by Good Housekeeping Bureau. All druggists, 40¢ each.

Alberta Beet Sugar Industry

In 1938 Southern Alberta broke all records for production of sugar beets in total acreage and tonnage produced per acre. The average yield per acre was somewhat smaller than in 1937, but nevertheless a fairly heavy attack of beet webworm and also some severe half frost damage to the crop has never been equalled in the district.

Figures for the present season show:

Acres planted	19,705
Tons produced	227,320
Beets Sliced at Raymond 1938	7,057
Beets Sliced at Picture Butte 1938	241,493

The sugar content of beets was 18.16% and 17.96% respectively.

The agricultural statistics of the crop for the last two years follow:

Acres	Beets	Beets Sliced	Sugar Content	Purity
Harvested	Bought	Tons	Cwt.	%
1937	19,819	23,481	227,320	18.16 88.47
1938	19,593	23,219	241,493	17.96 88.41

One of the important factors of improvement in the growing of sugar beets has been the Fifteen Ton Beet Club, fostered by Canadian Sugar Factories, the Lethbridge Herald and the Board of Trade. To qualify, a

Acres	Tons
1. Martin Brecka, Barnwell	19.88
2. B. B. Roberts, Raymond	25.06
3. Joe McMechan, Barnwell	20.90
4. Joe Payne, Barnwell	17.05
5. B. R. McMunn, Barnwell	52.71
6. J. T. Tiffin, Lethbridge	13.29
7. Geo. Barron, Picture Butte	20.97
8. Geo. T. Dill, Diamond City	15.10
9. Fred Kuykendall, Barnwell	20.12
10. Ivan E. Harris, Taber	28.14

beet grower must grow an average of fifteen tons per acre on his harvested acreage of beets and pass a successful field score. The prize winners for 1937 crop in the first ten places were:

The absence of even light frosts during the period allowed the continued crop growth without the final touch of ripening which light frosts will produce.

The agricultural statistics of the crop for the last two years follow:

Acres	Tons
1937	17.31
1938	16.54

While the figures are not completed for the 1938 crop contest, it is known that several of the winners have secured beet crops averaging 200 bushels per acre. The sugar company pays for the 1938 crop approximately \$1,650,000 to the farmers, \$220,000 for the 1937 crop, \$350,000 for materials and approximately \$350,000 for salaries and wages. Thus the production of new wealth from this industry is well over \$3,000,000 per year.

The circulation of these returns, nearly all of which are enclosed into the Lethbridge district, has contributed largely to the stability of Southern Alberta in the last years.

There is also the heavy excise tax placed on sugar by the Dominion Government which amounts to \$1.00 per cent of sugar. Thus the beet sugar industry of Southern Alberta has produced for the last couple of years a revenue of over \$780,000 from the beets grown in 1938. No other food commodity pays such a tax, and it is believed that sugar consumption is held down by this extreme excise tax.

British Troops Clash With Arabs In Trans-Jordan Territory

Jerusalem. Forty-five Arabs were killed and 60 wounded in a clash on Trans-Jordan territory with British troops backed by Royal Air Force planes.

Five British soldiers were killed—one of them an officer named MacAdam. Two were wounded.

Three squadrons numbering 15 planes participated in the battle, bombing and strafing the terrorists, who after an incursion into Trans-Jordan to pillage numerous villages, withdrew into the mountainous region near the Palestine border.

Three planes were hit. "Aboard one was Col. J. Chrystal, who directed the attack. It was stuck in 10 places and brought down. Sergeant Goggin, piloting the craft, was gravely wounded, but the colonel was unharmed."

The planes bombed the Arab band, then swept close to the ground to machine-gun them, driving them into the northern end of a valley, where they were pursued by the British and encircled.

According to latest reports, the Trans-Jordan government is now in complete control of the situation and calm prevails. The chief of the Arab band was reported among those slain.

Four Arabs were killed and 15 arrested as troops conducted investigations in Kafirin, Baldu Arrouba and Rihman. Twelve Arabs were wounded in an exchange of rifle fire at the market place at Nazareth. A Jewish night watchman was seriously wounded at Rehoboth.

London. The British government submitted its "final" Palestine plan to Jewish delegates to the Holy Land peace conference, who raised numerous objections during a three-hour meeting.

The Jews did not reject outright the British proposal, which calls for an independent Arab state in Palestine with the Jews a permanent minority.

They agreed to consider the plan further when the government submits it to them in writing.

Bank Robbery

Montreal. Two armed bandits entered a northern branch of Banque Canadienne Nationale, forced Emile Gougeon, teller-manager, into the cellar and escaped in a motor car with nearly \$1,000.

Provincial Boundary Bill

Edmonton. A bill approving the boundary between Alberta and Saskatchewan in the Lake Athabasca area was advanced to third reading in the Alberta legislature.

Limited Number Of Sudetenland Refugees Will Come To Canada

Ottawa. Hon. T. A. Crerar, minister of mines, informed the House of Commons government approval had been given a scheme to admit to Canada a limited number of refugees from German Sudetenland, for settlement in western Canada.

The number involved in present settlement plans was less than half the 3,000 mentioned in London and Prague despatches, he said.

The minister said he had no information at present as to where the railway colonization branches, arranging the move, intended placing the new agricultural settlers. However, they would be settled in small groups, for convenience and economy.

The refugees would be admitted under a 1930 immigration ruling which provided that farmers with sufficient means might be admitted. In the past two or three years, about 500 farmers a year had been admitted, Mr. Crerar added.

Mr. Crerar told the house urgent inquiries had been made after the Czech partition as to the possibility of Canada taking some part in dealing with the refugee problem. The immigration branch at once began inquiry as to the type and background of the prospective immigrants. It was found most were agriculturalists and small industrialists.

Last December, the minister continued, a delegation representing the Czech government visited Canada in this connection. Their request for co-operation had been fully explored and they were informed there was

no objection to Czech refugees being included among the farmer immigrants permitted under the 1930 amendments, providing they passed medical and physical examinations.

Each farm unit, averaging four persons, was required to have at least \$1,500.

When that Czech delegation returned from Canada, the Dominion government was advised the necessary financial arrangements had been made. The minister emphasized Canada was not undertaking any obligations or expense in the project. All necessary funds would come abroad.

Press reports of 3,000 refugees or 800 families being settled in the Peace River district and northern Saskatchewan were "pure guesswork," as far as their statistics were concerned, he said. No definite number had been set in the plan. The number would depend on their fitness, greatest care being taken to ensure they would be an asset to Canada.

Mr. Crerar said he believed the situation was being handled in a way to do most good to help the unfortunate refugees without adversely affecting conditions here.

"Has there been any investigation which would determine whether these people are Communists or not?" asked Harry Clark (Con., Toronto-Rosedale).

"The record of every family is being looked into. I am informed that probably 95 per cent. of these people are Roman Catholics," said Mr. Crerar.

Sir Henry Pellatt Dead

Was Famous As The Man Who Built Casa Loma

Toronto. Sir Henry Pellatt, one-time millionaire financier, who built Toronto's \$1,700,000 Casa Loma as a private residence, died at his modest home in suburban Mimico. He was 79.

Sir Henry was made a knight bachelor in 1905 for his military services but to the average Torontian he was famous as the man who built Casa Loma, a French medieval chateau atop a hill in the northwest corner of the city. It was taken over by the city for taxes several years ago.

The two-year job of building the fantastic chateau started in 1911. Its luxurious and rare furnishings, many of them collected by Sir Henry in Europe, were sold at auction years ago and Casa Loma became distinctly a showplace two years ago when it was rented by a service club whose guides showed thousands of visitors over the house.

Born in Toronto in 1860, son of a broker, Sir Henry's careers in finance and the militia started about the same time—when he was 15.

During his colorful financial career Sir Henry was reputed to have won and lost fortunes rapidly. Shortly after he entered the brokerage business in 1875 he was credited with making a profit of between \$300,000 and \$400,000 in shares of the Northwest Land Company.

Sir Henry lived quietly in recent years.

Under The Sea

Suggests Pipe Line For Oil From Canada To Britain

London. A pipe line connecting Canada and Great Britain across the floor of the North Atlantic to guarantee a constant flow of oil in wartime was pictured in the House of Commons by Col. John MacNamara, Conservative.

During discussion of the army appropriations Col. MacNamara, who recently toured Canada, said a supply of oil to Britain was necessary to keep the British army in the field.

Canada, he said, is one of the countries which is going to produce oil in large quantities and he wondered whether it would be possible to lay a pipeline to Britain. It would be double the length of any pipe-line in existence but he understood there were no engineering difficulties.

He received no reply from War Secretary Hore-Belisha.

Gibraltar In Danger

Tokyo. The Spanish correspondent of the newspaper Nichi Nichi reported "Gibraltar no longer is impregnable" due to a combination of "zig zag" military bases now being completed near the British stronghold by German and Italian technicians in co-operation with the Spanish Nationalists. Powerful "disappearing" guns could unleash a devastating fire on the central port of Gibraltar, the correspondent stated.

Optimistic View

Belief That International Situation Is Now Clearing

London. London newspapers were unanimous in reporting a more optimistic view regarding the international situation was held in high government quarters while the Daily Mail (Independent) said flatly:

"Mr. Chamberlain (prime minister) is planning to call a conference of big powers to consider calling a halt to the arms race in Europe, possibly before the end of the summer."

"Limitation may be aimed at aerial weapons in the first instance . . . If progress could be made in that direction the disarmament discussions might be widened to include world powers, including the United States."

"The scope of the conference would be extended also to include economic problems."

SEVEN THOUSAND BABIES SAW HIM FIRST

Midnight telephone calls will hold no further worry for Dr. Dugald Mc Dougall of Russell, Ontario, who retired from practice a few days ago at the age of seventy-five. During his long medical career, Dr. McDougall has brought more than 7,000 babies into the world. Above we see the popular family doctor at his desk, writing a last prescription.

ENVOY TO SPAIN

Bill Is Introduced To Control Profits On Defence Contracts

Ottawa. The government's long-anticipated bill to control profits on defence contracts was introduced in the House of Commons to the accompaniment of qualified approval from opposition speakers and sharp opposition from Jean Francois Pouliot (Lib., Temiscouata).

The bill will provide a four-man defence purchasing board to handle all contracts for the national defence department involving an expenditure of not more than \$5,000 and limit contracts not awarded by public tender to five per cent. on the capital employed in performance of the contract.

Mr. Pouliot conceded the only discordant note in the debate which preceded first reading of the bill. After Hon. Dr. Robert Manion, Conservative leader, had congratulated Hon. Ian Mackenzie, minister of defence, on his presentation and T. C. Douglas (C.C.F., Weyburn), had expressed approval of the plan, providing it was properly carried out, Mr. Pouliot bluntly told the minister he should withdraw his legislation as it was contrary to Liberal principles.

Profits could be controlled by the minister if he were given a free hand and not thwarted by incompetent departmental officials, he said. There was no need of an expensive commission to defeat the principle of ministerial responsibility and do the work the defence department and the minister should do.

The new board will make unnecessary the inter-departmental committee on the control of profits which has functioned for more than a year. That committee was advisory to the defence department. The new body will be independent of the department and will act on its own responsibility subject to approval of the cabinet.

The bill contemplates two kinds of contracts, those on which competitive bids or tenders are possible and those on which, by reason of the specialized character of the article required, such bids are not possible.

With regard to the former the board is directly instructed to let contracts only by tender after publication of the contract and for any reason the contract is not given to the lowest tender, approval of the governor-in-council must be obtained.

Where tenders are not practicable, the board must provide safeguards against excessive cost. Then after conclusion of the contract the board must determine the net profit made by the contractor and fix a tax equivalent to the excess of his net profit over five per cent. on capital. That tax will be collected by the income tax division of the department of national revenue.

Other features of the plan: The chairman of the board will devote his full time to the work and receive a salary.

The other three members will be paid by the day plus expenses.

Members of the board will be appointed for a five-year term.

Contracts will be made by the

board following requisitions from the defence department.

The minister of finance will submit all contracts to the cabinet for approval.

Contracts under the bill mean not only contracts for the purchase of guns, shells, munitions, clothing and other supplies but contracts for erection, repair or improvement of buildings, airports, docks, roads, fortifications for the defence department.

The bill also provides for the new plan for financing capital defence expenditures on a 10-year basis forecast in the speech from the throne. It authorizes the government to borrow money required for capital purposes by the issue of debenture securities repayable in 10 equal installments with interest at three per cent. a year.

Except for Mr. Pouliot's utterance, the house displayed more harmony than at any time since session when defence matters were under discussion.

Conservative leader R. J. Manion congratulated the minister on his presentation and suggested if he had made the same speech earlier much bitterness and misunderstanding might have been avoided. He was referring to Mr. Mackenzie's vigorous reply to criticism during debate on the Bren gun contract.

For The Common Good

Says Polles Must Be Reshaped To Meet Changing Conditions

Toronto. The policies of Canada's political parties must be reshaped and readapted to meet changing conditions as the Dominion is "crying out" for leadership, John Bassett, president of the Montreal Gazette printing Co., Ltd., said, addressing the Dominion curling championships annual dinner.

Mr. Bassett congratulated C. George McCullagh, publisher of the Toronto Globe and Mail, for his "patriotism and singleness of purpose" expressed in recent addresses in which Mr. McCullagh appealed to Canadian legislators to "forget party advantage and co-operate for the common good."

Stabilization Fund For China

Formed By Government And Two British Banks Contributing

London. Sir John Simon, chancellor of the exchequer, announced in the House of Commons the Chinese government has formed a \$46,912,500 currency stabilization fund, to which two British banks contributed \$23,450,000.

"The stability of the Chinese dollar," he said, "is a matter of great importance to this country in view of our financial and economic relations with China."

He intimated the British treasury would guarantee the \$23,450,000 subscribed by the British banks and seek parliament's approval of the guarantee.

Britain Is Prepared To Defend Her Ships In Spanish Waters

London. The threat of Nationalist General Franco to attack foreign vessels trying to reach Republican Spain brought a stern warning from Great Britain that she was prepared to defend her merchantmen whether on the high seas or on Spanish waters.

Foreign Secretary Viscount Halifax told the house of lords the royal navy had been instructed to protect British shipping and to retaliate against any attack made by Spanish Nationalist submarines, as threatened by Franco.

"Instructions have been given to His Majesty's ships," he said, "charging them to give all necessary protection to vessels which might be the objects of such attacks and to retaliate even inside territorial waters against any submarine taking such indefensible action."

"I wish to make it plain that if action outside territorial waters were taken, His Majesty's government would be obliged to resist such action in the same manner as they have done in the past. I must also make it perfectly clear that the gov-

ernment would regard as a serious matter the sinking of a British merchant vessel even within territorial waters, especially if due warning had not been given and adequate steps taken for the safety of the crew."

The warning was backed up by the arrival of the British cruiser *Hood*, the destroyers *Iris*, *Imogen* and *Ivanhoe* at Gibraltar following orders to join the fleet man-of-war in the Mediterranean.

At the same time it was disclosed the British steamer *Stangate* successfully ran the Nationalist blockade and docked at the Republican port of Valencia with a cargo of foodstuffs.

Lord Halifax rejected a suggestion Britain urge Franco to grant general amnesty to Spanish Republican leaders.

"In my view it would be quite impossible and improper for any foreign government outside Spain to claim to be in a position to judge the blame-worthiness or otherwise of individuals or to lecture the Spanish government (Nationalists) upon how they should carry out the task resting on their shoulders."

"Happily, we now have, in my opinion, great cause to hope for continued peace."—Prime Minister Mackenzie King.

NOTES AND COMMENTS

CHANGE the system—the words are uttered mostly by would-be-political leaders, and re-echoed throughout the land, without serious thought or definite plan to take the place of the present system. The system is always changing; though to hearken to some it is responsible for all economic ills.

EVERYTHING changes—in building, transportation, the styles of clothes, methods of merchandising—in fact the passage of time brings changes, despite the whimperings and propaganda blaming this and that political party for the so-called evils of the day. The world always has been the scene of progress, change and decay. There is no political party possessing the cure-all for defects or lapses of human nature, for those who cry out the loudest are possessed of just as many frailties, and just the average amount of ability, possibly less, than those whom they so loudly criticize.

NO MATTER what system is employed, the shrewd minds will be at the top, while the vast army of the mediocre will be just marching along as they always have done. Bring everybody down to the same level, give them the same amount each day for their labor, and in the course of time you would see those possessing keen and alert minds at the top of the heap, just as they are today.

NO NEED to go outside of Alberta to find how true it is. For several years the Social Credit leader has used his Bible Institute to propagate a political cause. Contributions poured in from thousands of average people, and an institute originally erected for religious teaching has been made the instrument for something entirely different. Who gets the "plumb?" The leader is ensconced in Edmonton, with several thousands per year salary; his trusted lieutenant also draws several thousands, while the thousands who helped to place them there by their cash contributions and votes are more heavily taxed than they ever were before. Just an instance of native shrewdness and ability to capitalize on the emotional sense of the people.

A CERTAIN Mr. Herridge, almost unknown until he married a sister of former Premier Bennett, is the latest to bob up with a "change the system" battle cry. Also there is youthful

George McCullagh, editor of The Globe and Mail.

OUT of the medley of proposals to "change the system," there will undoubtedly be sifted the wheat from the chaff, but don't overlook the fact that the "plumb" will still go to the boys who climb the tree, while the mob will continue to pay. There may be a field-marshall's baton in every soldier's knapsack, and in a democratic country the most lowly taxpayer is not denied the privilege of rising to the top, but it is ability, intelligence and shrewdness above the average which enables him to rise. When you hear a political leader distracting attention from himself by blatantly criticizing everyone else, telling the people they should revolt against the existing order, just take a peep behind the scenes and take stock of the benefits he is receiving from the system he so loudly abuses.

BY THE time this appears in print, the writer will be in Ottawa, not for the purpose of securing any special privilege, but to attend the semi-annual meeting of the executive of Canadian Weekly Newspapers Association, which includes in its members most of the enterprising weekly newspaper publishers from the Atlantic to the Pacific. If time permits, we may have a peep at the House of Commons in session. Last year the members of the executive met Premier King, who expressed surprise that they had come—not to ask for something, but to pay him a friendly visit. He could hardly believe that any delegation would wish to see him unless they wanted something. The Press of Canada has never sought any special favors for itself, but it has championed the cause of the people in an unselfish manner without thought of reward. It is easy to understand why some politicians would like to control the Press. Its independence and freedom from political control is one of the bulwarks of freedom of the people. A government which controls the Press, controls the people, and denies the right of free speech. Take a look at certain European nations to find how true it is.

DICTATORS provide an element of comedy, made the more ludicrous by their efforts to impress people. A news reel at the Palace showed Prime

Minister Chamberlain being escorted by Dictator Mussolini on the former's visit to Rome. Mr. Chamberlain was attired in the quiet yet dignified style of an English gentleman; double breasted cloth coat, soft hat, and carrying an umbrella. He had a pleasant smile. Mussolini with his ever-present frown, protruding lower jaw, clothed in

military uniform and with sword swanking at his side, provided a striking contrast. It seems that some (and they are not confined to dictators alone) fancy a uniform gives them a superior air. Often it covers maybe an inferiority complex. What is lacking in personality, some evidently try to make up for in impressing others with uniforms and trappings.

"Do not allow any spirit of contempt for government or political parties to cause you to ignore Canada's social problems."—Hon. Dr. R. J. Manion.

BEEF—in lounging pajamas!!

WHAT'S FUNNY about that? Why shouldn't fine Western beef show due appreciation for the finer things in life! Ferdinand, the famous Bull, loved flowers. Why shouldn't Western beef, equally sensitive, love flowered cottons!

Western flour, too, is at home in cotton. In gaily stamped sacks, this product of the Prairies goes East to be welcomed into millions of homes. In fact, the way cotton is sent West to dress up beef and flour that will go East, is one sure indication of the interdependence of these two parts of Canada.

Food and clothing! Both are necessities. Both are produced in Canada, and both provide jobs for the people who produce them. Over 10,000 Canadians have jobs because Dominion Textile makes cotton and rayon goods.

"A Pig in a Poke"

In early days the word *poke*, meaning a bag, pouch or basket, was commonly used. We're told that a favorite trick at fairs was to put a pig in a bag and sell it to a greenhorn for a sucking pig. If he opened the sack at the fair he "let the cat out of the bag." If he didn't discover the deception till he got home, he was laughed at for buying "a pig in a poke."

There's no such thing as "a pig in a poke" at EATON'S.

Before each Catalogue is printed the experts in the EATON Research Bureau read every statement to be made regarding all the merchandise presented. Hence, if we say an article's All-Wool—it is All-Wool. There's nothing vague—noting uncertain—noting that can be taken two ways. Always, you KNOW what you're getting.

That's why, at railway stations, docks and airports in the West, you see mail bags by the hundreds and freight by the ton from EATON'S—proof positive of the confidence our customers have in us.

EATON'S

NEWS TO KRYSCHEK

A newspaper report from Kimberley and published in an Alberta daily last week stated that Mike Kryschuk was named coach of the Canadian team.

Where this reporter received his "inside" information no one seems to know, especially Mike Kryschuk, who states to The Journal that it was his first intimation he had received that he was to use the crude term, "all washed up" here. He remarked he did not know if he would be here next season, but that was for the future to decide.

HERE'S FOUR PIES FOR A BRIDE

Salmon and Pea Pie

One can Canadian salmon, 1 can condensed cream, 1 cup water, 1 tin of salmon, crush the bones, remove skin and add salmon to the soup. Flake turn into deep casserole or fill individual custard cups. Moisten rim of casserole or custard cups with cold water, place pastry on top, crimp edges and bake until crust is golden brown.

Chicken Haddie and Celery Pie

One can Canadian chicken haddie, 1 can condensed cream, 1 cup water, 1 tin of salmon. Flake turn into deep casserole and add to the soup. Turn into deep casserole or fill individual custard cups. Moisten rim of casserole or custard cups with cold water, place pastry on top, crimp edges and bake until crust is golden brown.

Finnian Haddie Tomato Pie

One 2-pound can Canadian haddie, 1 can condensed tomato soup, 1 cup water, 1 tin of salmon, crush the bones, remove skin and simmer for a few minutes until fish is cooked. Flake. Heat soup and pour over finnan haddie which has been placed in a deep casserole. Moisten rim of casserole or custard cups with cold water, place pastry on top, crimp edges and bake until crust is golden brown.

Lobster Mushroom Pie

One 6-ounce can Canadian lobster, 1 can condensed cream, 1 cup water, 1 tin of salmon. Flake lobster into deep casserole, removing all bones. Heat soup and pour over lobster. Place pastry on moistened rim of casserole, crimp edges and bake until crust is golden brown.

A "beautician" says women will be wearing topless bathing suits within three years. It would be novel to see them breasting the waves, and vice versa.

Pee-Wee Hockey

Coleman All-Stars 9, Blairmore 2. In a pee-wee hockey game played at the Coleman arena Saturday last, the Coleman All-Stars defeated Thompson's Maroons by a score of 9-2.

The locals had a decided edge in play, and won the 5-2 defeat handed to them by the same team in Blairmore earlier in the week.

Before the game, Edgar Reid took pictures of Coleman's six pee-wee players, and later took pictures of all the pee-wee players present. Judging from the enthusiasm shown, the youngsters thoroughly enjoyed the evening.

PEE-WEE HOCKEY TEAMS WELL SPONSORED

Now that senior hockey activities are completed, we feel that the interest of the public may revert to the remaining pee-wee games.

Rising out of the Booster Club meeting last year, a committee was formed to manage pee-wee sports. While the season was short, the committee met with some success, and were fortunate in obtaining five sponsors for teams and equipment, and a grant from the Legion to run off. One important fact was noticed in the lack of ice surface for the youngsters, and we were fortunate this year in the civic authorities placing the open-air rink at the disposal of the local children.

We also hope that ice will be made available at the West Coleman school next year.

During the present season, equipment was purchased for six teams: Elks, Slovaks, Pattinson's, Polish, Italians and Shamrocks; and credit is due to the sponsors for their interest and financial support. Each team can play 14 games, making a total of 84 boys, having a direct interest in the games, with many more coming along for next year.—Contributed.

COLEMAN JUVENILES 4, NATAL-MICHEL JUNIORS 1

Coleman Juveniles maintained their undefeated record at home by defeating Natal-Michel Juniors in a game played at the Coleman arena on Sun-

day.

Summary—
First period: 1. Coleman, Raymond (Kotek); 2. Coleman, Beddington, Penalties: I. Smith.

Second period: 3. Coleman, Salvadore (Fontana). Penalties: Garrett, Terry, Cline, 1; Raymond, 4; Natal-Michel, Billy Smith (Big Weaver); 5. Coleman, Kovac (Raymond). Penalties: Salvadore, R. Thomson, J. Weaver, Coleman, 1; Natal-Michel 1.

TRAIL JUNIORS DRUBBED BY E.A.C.S. IN PLAY-OFFS

Trail Juniors, provincial B.C. winners, were no match for the mighty E.A.C.S. in the Alberta championship in their inter-provincial series in the Dominion's championship play-offs.

In the first game Saturday evening Trail lost 10-3, while on Sunday night, equally as hard, 14-1. Both games were played in Edmonton, it being a best of three games.

Jack Jackson, coach of the Canadian players and coach of the Trail team, and speaking to the writer at the local C.P.R. depot on Friday on his way to Edmonton, he reported that Edmonton was strong as reported, his team stood little chance. That the Albertans are a strong aggregation was amply demonstrated in the series just concluded.

KIMBERLEY WINS B.C. HOCKEY CHAMPIONSHIP

Kimberley Dynamiters rule as senior hockey champions of British Columbia by a score of three wins over Trail Blazers in the B.C. finals played during the past week. Kimberley now await the Alberta champions, expected to be Lethbridge Maple Leafs. Kimberley won by scores of 6-5, 6-3 and 6-2.

SIDNEY HOUGHTON WON HOCKEY CONTEST

At the start of the hockey season last year, The Journal sponsored a contest in which hockey fans were asked to list how they thought the teams in the Alberta senior league would finish. The winner proved to be Sidney Houghton, who was very close. His forecast, however, was correct with the exception of Coleman and Olds, having given the nod to Coleman for the fourth place position, and placing Olds in fifth place.

He had Lethbridge to win 20 games and lose 12. Leafs won 22 games, drew three and lost seven. A year's subscription to The Journal will be given to Mr. Houghton as his reward.

WORLD HAPPENINGS BRIEFLY TOLD

Gold bullion valued at £1,000,000 (\$4,891,875) was unloaded at Embury docks, London, from the Soviet steamship Minchory recently.

Dr. Eduard Benes, former president of Czechoslovakia, declared that "dictatorship regimes are coming to the breaking point."

It was announced that more than 130,000 Austrian Jews had applied for visas to the United States since Austria was annexed by Germany.

Prince Arthur of Connaught left £10,418 (\$513,000), probate of his will disclosed. Prince Arthur, son of the Duke of Connaught, died September 12.

One of the biggest British military hospitals outside Great Britain is being speeded at Singapore. It comprises a main block and three wings, and is three storeys high.

A record number of almost 7,000 British tourists countries visited the British Isles in May. The figure represented an increase of more than 700 over last year.

Henry Mackenzie-Kennedy, chief secretary of Tanganyika territory, has been appointed governor of Nyasaland, succeeding the late Sir Harry Old Kittermaster.

The United States secret service said it had smashed a \$1,000,000 counterfeiting ring, the biggest in the country, with the arrest of six men and two women.

Canadian National Railways employees last year numbered 74,933, with an annual payroll of \$116,526; 108, Hon. C. D. Howe, minister of transport, told a questioner in the House of Commons.

A total of 31,894 new recruits have joined the Royal Air Force since last June, the air ministry announced. Air Minister Sir Kingsley Wood in June set 31,000 as the number of recruits desired by the end of March, 1939.

China Holding Her Own

Says Japan Would Gladly Withdraw Armies If Possible

Japan is already beaten in the war in China and would gladly withdraw her armies if she could save her face, John Pomeroy, who, during the world war, received \$125,000 from the British government for the rights of an anti-Zeppelin explosive bullet which he invented, said on his return from China.

Pomeroy said that for the last six months he had been attached to the staff of Generalissimo Chiang Kai-Shek.

"I cannot disclose the nature of my mission, but I was able to see the fighting at close quarters and to study the mannerisms and the methods of bushwhacking," he said.

"China's chances improve every day the war continues. The Chinese, man for man, are better soldiers than the Japanese. Their guerrillas are harassing the enemy almost to destruction."

"No Japanese soldier is to be found to-day more than five miles from a railway track."

"China's arsenals are now running splendidly. They are turning out nearly 1,000 light and heavy machine guns a month, in addition to trench mortars and rifles. I visited one arms factory which was producing 500,000 rounds of ammunition for small arms each day. The quantity can be increased under extreme pressure."

Made in Japan

Japanese Toys Now Shipped Abroad Without This Inscription

Toys made in Japan are now being shipped abroad without the tell-tale inscription "Made in Japan."

Instead they are just stamped "Foreign."

The Japanese manufacturers hope that this dodge will enable them to avoid the effects of the world-wide boycott of Japanese toys which has developed as a result of Japan's aggression in China.

Money Soon Went

On the steamship "Niagara" on its way from Canada to Australia, her fare paid by a charitable organization, was a waitress who won \$5,000 in an Australian sweep two years ago. It looked like a lot of money to her. She quit work, joined a sister in Montreal, learned what a little way \$5,000 will take two people, and for the past year has been living on relief.

Fighting Opium Evil

The Chinese government has unanimously decided that, despite the present war, every effort must be made to exterminate the opium evil throughout China. The spokesman of the executive Yuan revealed the cabinet approved a program for the complete suppression of opium in Szechuan province during 1939.

To Safeguard Mountain Skiers

Precautions are Taken To Guard Against Many Hazards

Skiers in increasing numbers are now finding their way to the Canadian Rockies looking for new fields to conquer. By getting in touch with those who are familiar with the local terrain and qualified to organize ski expeditions with due regard to existing conditions, visitors may avoid unnecessary hazards and assure themselves of the fullest enjoyment of the unexcelled opportunities for skiing available in the Rocky Mountain parks.

All ski centres in the parks first aid and emergency equipment is provided, and in the interest of safety, ski-ing parties are not permitted to venture from designated areas without the services of a licensed guide. Two classes of guides are available; the ski-mountaineer guide who has the highest ranking and can take parties anywhere in the mountains, and the ski guide, who is permitted to operate only in specific regions.

In order to help safeguard skiers against the hazards of snow slides and avalanches, park officers in Banff, Jasper and Mount Revelstoke National Parks are co-operating with the Rocky Mountain Ski Zone Committee of the Canadian Amateur Ski Association. In the course of their regular patrols, park wardens are assisting field observers in gathering avalanche and weather data, an analysis of which will enable the recently formed snow survey committee to issue warnings and reports on the situation. As the fund of information regarding Rocky Mountain weather and snow conditions increases, it will be possible for the committee to forecast the behaviour of specified avalanche slopes with reasonable accuracy.

Another phase of this important work is the posting of warning cards which list many practical "don'ts" for skiers, and specifically warn visitors against ski-ing alone in the mountains unless on a regularly and frequently travelled trail. Skiers are also urged to register out and in with the nearest warden or at the office of the park superintendent when undertaking a trip not on the main ski routes.

DISTINCTLY UNIQUE APRONS

By Anne Adams

BE DIFFERENT—when you choose a new apron style! Here's the originality you like to have for yourself. (And consider how ideal bell-shaped versions are as bazaar contributions!) Your family and friends will delight especially in the Apple Apron, for the fruit and flowers are the highly popular stay-at-home fad. Pattern 4981.

The pattern is available in sizes, small, medium and large. Small size, view A, takes 2½ yards 35 inch fabric, 1 yard cotton and 2½ yards ruffling; view B, 2½ yards 1½ inch fabric and 3½ yards ric-rac.

Send twenty cents (20c) in coin (stamp cannot be accepted) for this pattern. Address your name, address and send order to the Anne Adams Pattern Dept., Winnipeg Newsprint Co., 116 McDermot Ave. E., Winnipeg.

The planet Mercury has no atmosphere. Spectroscopic photographs show it as a dry, sun-baked, waterless world.

Horse Disease

Sleeping Sickness in Horses Requires Prompt Attention For Safety

The Agriculture Department of the Saskatchewan Government, under the direction of the Minister, Dr. W. G. McCullough, has conducted an exhaustive study of sleeping sickness among horses, and the additional fact that humans are susceptible to this disease may be accounted for by the general public be acquainted thoroughly with the results of this study, and the symptoms and prompt treatment of this devastating

Hysteria

Encephalomyelitis or sleeping sickness of horses was at one time described as a progressive form of cerebro-spinal meningitis and thought to be due to animals eating spoiled feed or drinking contaminated water. This was held until 1932 when Dr. Karl F. Moore of California demonstrated that the disease was due to a germ which gains entrance to the animal body and locates in the brain. The virus is so minute that it cannot be seen even with the aid of our most powerful microscopes and is capable of passing through very fine porcelain filters.

We now recognize two types of encephalomyelitis virus (germ) on the American continent, one known as the Western and the other as the Eastern strain. Although the symptoms of Eastern and Western encephalomyelitis virus in horses should be given in large quantities, administering not less than 250 c.c. of medicinal alcohol to the horse.

In fact, drugs should not be given by the mouth unless there is absolute certainty that the throat muscles are paralyzed. Medicines given by the mouth usually goes to the lungs causing mechanical pneumonia, a disease from which few animals recover.

The patient should be made as comfortable as possible and, if lying down, most of the time should be spent in a recumbent position to be held deeply to prevent sores developing and cold drinking water should be within the animal's reach whenever possible.

During 1930, in California, it soon spread into the adjoining States and in a few years could be recognized in most of the Western States of the Union. It was not understood that the disease was not a new one. In fact, as early as 1847 it was probably responsible for the great losses among horses in Eastern and Western America.

In 1935 a disease of horses appeared in the Northern States of the Union, spreading into Southern Manitoba from time to time. South-Eastern part of Saskatchewan. The symptoms presented by this diseased animals strongly resembled the disease in horses in California, the disease was immediately considered as such although the presence of the virus had not yet been definitely demonstrated.

Realizing the seriousness of the situation, work was immediately undertaken with a view to determining the presence or absence of the virus in horses. It was found that time however, a new vaccine had been developed which is prepared by growing the virus of encephalomyelitis on the brain tissue of deer embryos.

A great deal of experimental work has been done at the University Veterinary Laboratory and considerable success has been achieved. The product has been highly satisfactory in preventing the disease in horses and experiments have shown that it will protect susceptible animals against massive doses of virulent virus (germs) introduced directly into the blood stream. There is no doubt, one of the most satisfactory that has ever been developed for the prevention of any disease, its use is strongly recommended.

Transmission To Man

Although the economic aspect of encephalomyelitis presents a problem which requires urgent attention, it should also be realized that the margins of profit are gradually decreasing.

The outbreak of 1935 commenced in July and did not reach its peak until towards the end of August, coinciding with the onset of cold weather, after which few cases developed. In 1936 only isolated cases of the disease appeared, but in 1937 and 1938 successive outbreaks were experienced.

The 1937 epidemic again commenced in South-Eastern Saskatchewan, spreading from the south through the Province generally. In 1938 encephalomyelitis appeared almost spontaneously over Saskatchewan and at a much earlier date than had the previous year. This was probably due to the recognition toward the end of June.

The fact that the epidemic appeared suddenly and throughout the Province was a new feature.

The 1938 outbreak again suggests that there is now a reservoir for the virus and until such time as it is destroyed or the cycle of the virus broken, we might expect the disease to continue quite regularly unless steps are taken to protect susceptible animals.

Symptoms

The symptoms presented by animals suffering from encephalomyelitis are not at all constant, in fact, the disease might be classified as two types, depending upon the signs exhibited.

Nervous Type:

In the nervous type the animal appears highly excited, the signs of the disease are similar to those of a dog or any solid object to which it was hitherto accustomed and even afraid of attendants it had known for years. The horse may stand quiet for a few moments, then become excited, jump into the range or actually attempt to climb the walls.

These symptoms become less pronounced and in the majority of cases disappear or become latent. Very often the hindquarters are affected, horses having difficulty in standing up, with big pocket instead of Apple pocket and saddle-neck straps of square mesh. These ruffles make pretty trim. The straps are the highly popular stay-at-home fad. Pattern 4981.

When handling horses suffering from the nervous type of encephalomyelitis, great care should be exercised, as many people have been injured by such animals when they became excited.

Do not force the animal to stand, when the quietest of horses during the acute stages of encephalomyelitis as at that time they are quite irresponsible and liable to do serious harm.

The other type of encephalomyelitis has been aptly described as the "gymnast's notion" because the animal stands still for hours at a time, apparently quite uninterested in his surroundings. If in the stable, there is a tendency to back up in the stall and paw slightly on the halter. When forced to move,

actions of diseased horses are slow and deliberate and, as the disease progresses, the gait becomes unsteady and uncoordinated. The animal spreads apart its feet to keep the body steady and, in some instances, affected animals will leap against the stall, something which is seldom done by horses affected from any other disease. In the so-called dumb type, paralysis sets in early and, unless the disease results in death, death usually results.

Transfusion

How the disease is transferred from one animal to another is not clearly known. Whatever means are used to carry the virus which may convey the disease is unknown. The virus enters the blood stream of a diseased animal and passes to the blood stream of healthy animals. This theory is strengthened by the fact that encephalomyelitis is a disease which appears in late June in which while the weather becomes warm and flies are most numerous gradually subsiding with cooler weather, the disease increases.

Treatment

The treatment of developed cases of encephalomyelitis is not very satisfactory unless instilled directly into the early stages. When administered in large quantities, administering not less than 250 c.c. of medicinal alcohol to the horse.

When the disease is in the early stages, the rubber cap on the vaccine bottle and the contents drawn into the syringe.

The skin on the site prepared is held firmly with the left hand, the needle introduced into the skin and the vaccine injected.

When the skin is removed, the area which was wet with or soaked in rubbing alcohol.

After the needle has been used, it is placed in a small vessel such as an eyeglass cup and rubbed with alcohol before it is used on another horse.

The alcohol, of course, should be blown out of the needle before it is used on another horse.

(a) Pulling the plunger of the syringe half way up

(b) Attaching the needle to the syringe

(c) Injecting the vaccine

At all times, handle the needle with the base so as not to contaminate the part being introduced.

At 85° F. temperature chick vaccine will quickly lose its effectiveness and ready for use it should be kept at ice box temperature—from 35-40 degrees F.

Syringe

Syringe is the treatment of developed cases only and should be used as a preventive when vaccination is given.

Chick Vaccine may be bought from druggists, veterinarians, or municipalities. If you do not know who has it for sale, the Municipal Services Commission of the University of Saskatchewan, 7313 cents plus Educational Tax.

Do not use any Vaccine but "CHICK" Vaccine made by the University of Saskatchewan.

There are many other vaccines made for other purposes, but none of them will protect horses from Encephalomyelitis.

work yourself rather than to employ unqualified individuals who may use the wrong type of vaccine and may carry disease from one farm to another.

10. The cost of the vaccine is 73½ plus education tax for a complete double treatment of two 10 c.c.

Method Of Vaccination

1. A 10 c.c. hypodermic syringe should be used, and may be had equipped with two needles, not more than \$1.00. The instrument and needles must be boiled for thirty minutes.

2. A small area in the centre of the horse's neck half way between the shoulder and head is clipped and cleaned with rubbing alcohol.

3. The needle is now attached to the syringe and the rubber cap on the vaccine bottle and the contents drawn into the syringe.

4. The skin on the site prepared is held firmly with the left hand, the needle introduced into the skin and the vaccine injected.

5. When the skin is removed, the area which was wet with or soaked in rubbing alcohol.

6. After the needle has been used, it is placed in a small vessel such as an eyeglass cup and rubbed with alcohol before it is used on another horse.

The alcohol, of course, should be blown out of the needle before it is used on another horse.

(a) Pulling the plunger half way up

(b) Attaching the needle to the syringe

(c) Injecting the vaccine

At all times, handle the needle with the base so as not to contaminate the part being introduced.

8. At 85° F. temperature chick vaccine will quickly lose its effectiveness and ready for use it should be kept at ice box temperature—from 35-40 degrees F.

Syringe

Syringe is the treatment of developed cases only and should be used as a preventive when vaccination is given.

Do not use any Vaccine but "CHICK" Vaccine made by the University of Saskatchewan.

There are many other vaccines made for other purposes, but none of them will protect horses from Encephalomyelitis.

For this is your vaccination, with one mind, as the Authorized Version translates. "This oneness of mind does not demand the monotony of uniformity, but variety and variety. Not the oneness of brick, but a pile of bricks; but, of course, the house, in which many different materials and contrivances combine to shelter the human race, is not one in the sense of all holding one mind in the same of all holding the same opinions; but we may be all of one mind, when, beneath diversities of opinion, expression, and view, we are all moved by the common devotion of Christ" (F. B. Meyer).

Peter counseled his reader to be compassionate (sympathetic) loving one another, kind, benevolent, humble-minded, not paying back evil for evil, reviling for reviling, but, on the contrary, blessing those for others means being thoughtful of others welfare. It consists not in feeling, but in doing; not in words but in deeds.

For this is your vaccination, with one mind, as the Authorized Version translation. "For" Peter quotes Psalm 34, 12-16 where blessing is promised to the one that trusts in God. "The whole Psalm promises salvation in personhood, and describes the situation in which Peter's faith sees his readers placed in danger, but with the angel of the Lord, who is the shield, and all things working out a blessing for them if they trust in him" (Dummelow).

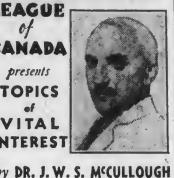

It is a marvel to find in any community under heaven a complete embodiment of these injunctions.

It were a fair vision, with good to follow, but a bad vision following less

is also that which our Lord died to secure.

Without it would become us to others, which one could adopt the words of these verses as the binding rule and regulation of daily life" (F. B. Meyer).

by Ruth Comfort Mitchell.

W.W. SERVICE

CHAPTER IV.—Continued

Sarah Lynn obeyed, grateful for the long, cool, stinging drink which seemed for an instant to freshen the stale air.

Sarah Lynn watched Duncan with apprehension. If he gave over his usual caution he would insist on staying late, and she was so tired and so tired. She tried to remember her maid may have from the immediate service and think of her travelling Cousin Sally Ann, of the tall young Norseman who had stood framed in Aunt Helena's doorway. Why—if he was what he looked to be—did he run about with Jim Allison? But Jim was a brilliant flier who had met him abroad; Gunnar Thorwald could not know that Arline and the Stewed Prune went with him. She hoped he wouldn't come here tonight. She didn't want them making game of him, and if Mary Webster was right and they were planning to make him the object of one of their high-keyed, hectic, ribald jokes—she would warn him.

Mary Webster took Sarah Lynn back to her table. "It'll soon be the last round-up for old Neddy. Shan't we drive you home?"

"Oh, thanks, I'd be lost, but Duncan—mother'd be annoyed if—she was interrupted by a ringing yawn. "Oh, excuse my place!"

"For lamb; dead for sleep, aren't you?"

She sat down. "Perhaps another ginger ale would wake me up," she said dully.

"It will, darling! I'll get it." Arline had followed them.

Ned Webster, a large and very solid citizen, came up warily, mopping a heated brow. "Gosh, Mary! He says he isn't leaving till sun-up!"

"The customer is always right," his helmate reminded him.

"Say, I'd rather lose the account," he moaned.

Ardine came back with the cool bottle and the tall amber glass. "Here, baby! This will brush out the cobwebs!" Then she looked at her sharply. "Listen, darling—did you have a couple of drinks before you got here?"

Sarah Lynn said: "No!" explosively.

"You know she never touches—" Ned Webster began indignantly.

"Of course that's why I'm wondering. I've never seen her this way. I thought maybe Duncan had a flask, and that while they were driving around—Oh, well—never mind!" She looked at Ned Webster. "The riding racket pretty low?"

His wife nodded.

"Well, look," the hostess said quickly, "why don't you take him home and we'll deliver the customer at your door in the rosy dawn?"

Mr. Webster made sounds of faint pleasure.

"More people are coming, and he has so large a displacement, I'd rather have him do his sleeping in his own bed, if you don't mind."

"All right, soldier; the pardon has come," his wife prodded him. "Thanks a million, Ardine."

Sarah Lynn, watching their exit, yawned widely again. "I can't imagine what makes me so sleepy," she apologized, drinking thirstily.

The others regarded her shrewdly. "Well, if you really haven't had anything—" Sarah Lynn was shaking her head violently—"it must be just this

The flier interrupted again. "At once, please, we go."

CHAPTER V.

Jim Allison and a couple of his friends had arrived at the field. "Evening, Pete!" Allison greeted the man who stepped forward. "Lieutenant Thorwald's delayed, so I'll warm up for him."

"Okay, Cap'n Allison."

"Gas her, will you? Get the weather report. He'll want to hop immediately."

"Betcher!" Told me he was off."

"I told you he was delayed. Snap into it, will you?" Allison said sharply.

"Okay, sir." He started away.

"May have to sleep out in Mexico; there's a big roll of bedding to stow away."

"I'll tend to it, sir."

"You do what I told you. I'll take care of the bedding. You let it alone; understand?"

The man hurried off. "Walk wide of him this night," he told a youth in overalls, out of the corner of his mouth. "He'll bite the head off you."

"Yeah?" Had a couple drinks again? He better cut that out."

They were starting together when Reddeley and Lieutenant Thorwald drove up, and the older man saluted clumsily.

"She's purrin' like a pussy cat, sir, but Cap'n Allison, he went home sick, poor feller. He couldn't hold his head up. He says you must hop without him and he'll telegram to Los Angeles."

"Very good," the Norseman nodded. He turned to the medical student who still bow. "I am obliged, you may know."

"All right," Reddeley said, relieved. "I hope there won't be any more jinx."

The aviator did not answer. He was stepping swiftly about his ship, ice-blue eyes keen for the faintest flaw in her shining perfection.

Reddeley ran back to his car, jumped in, backed and turned and slid into high and was off at top speed. Half a mile down the road a parked car snapped on its lights and honked noisily, and he jammed on his brakes and came to a slithering stop.

"Okeh?" Jim Allison asked hoarsely.

"Well—Lord, I guess so!" Reddeley said. Beads of sweat stood on his face. "Boy! What a night!"

"And what a day is coming!" shouted the tier's car contraband.

"Say, Jim, those doors don't fly open—or—or—anything do they?"

"No," Allison said shortly.

"Well—better beat it back to the Prune and rehearse our parts with Ardine."

Sarah Lynn said to herself: "I can't possibly sleep with the music beating and pounding, but I don't want to wake up, because I can't sleep."

Her head ached hideously and her mouth was dry. But the air in her nostrils now was sharp and sweet and cold, and she was shivering.

"I'm pretending so hard that I'm actually cold!" she exulted. "But I won't sleep my eyes, because I can't even close them. I am asleep, and let me alone!"

She dozed again. Then "I wonder if I could open my eyes . . . they're heavy. I never heard such solid music, and there isn't any tune; just throbbing and pounding and roaring."

"I think I'll open my eyes for a minute, now I'll keep right on pretending, because I can't believe I'm not here." Then she was saying in a scared whisper: "I can pretend with my eyes wide open! Sitting right here in the Stewed Prune with the horrible music roaring at me, I can pretend I'm in a plane, up among the stars, flying away in the night!"

Her teeth were chattering; her heart was in her throat; her head was blazed with pain. "But why am I pretending to be all wrapped up in blankets? Mercy, if I can't believe this I needn't be afraid of anything—nor Arline, nor Mother, nor Duncan, nor Detroit! Nothing will matter!" Her nostrils dilated and she pulled deep drags of cold air into her lungs. Her head cleared. She sat bolt upright.

A rush of heat and instantly her knees buckled under her. She sat down upon the floor, passing gripping fingers over her eyes, fell forward on her face, and slept.

It was the major thrill in the existence of the Stewed Prune. "Not Sarah Lynn?" they gasped. "In person! Simply blotto!"

Duncan Van Doren reproached her heavily. "Oh, no! You wouldn't have a drink when I asked you, Oh, no!"

"Oh, Duncan, hush, before I slap you down!" Ardine snapped at him, taking competent charge. The girl, thin hand trailing, was rushed to the dressing room, and the hostess turned to the flier. "Gunnar, I'm sunk, that had to happen. The poor baby—it's the first time she heard a cold."

He cut coldly into her speech. "I seek Jim Allison."

"Oh, yes, of course. He telephoned—he was detained, but he's going right out to the field and he'll warm up the plant or whatever it is. Doc Reddeley'll drive you out. Lieutenant Thorwald, this is almost—Dr. Reedley. Just dashing down the home-stretch to a degree and he'll be so glad to—"

He cut coldly into her speech. "I seek Jim Allison."

"Am I pretending—him?"

(To Be Continued)

A hundred years ago, archaeologists were bringing some of the ruins of Carthage to light.

Despite its name, the house centipede has only 30 legs—not 100.

WOMAN AGED WITH SCIATICA

Now Praises Kruschen

When sciatica attacked this woman six years ago, she couldn't move without great pain. Treatment after treatment failed to help until she tried Kruschen and got quick relief.

"Six years ago, I suffered terribly from sciatica," she writes. "I tried everything, but to no avail."

"I took Kruschen tablets. The first few doses gave quick relief. At the end of a few weeks my sciatica had gone. Now I never begin the day with a pinch of Kruschen and a glass of water. I live a strenuous life, being widowed four years ago, and having a son to keep. I run a boarding house, rise at 6 a.m., and retire at 11 p.m. I weigh 52, but everyone says I look 32 thanks to Kruschen Salts." (Mrs.) F.R.E.

The severe pain which is characteristic of sciatica is caused by needle-pointed uric acid crystals in the sheath of the great sciatic nerve. Two of the ingredient salts in Kruschen dissolve these uric acid crystals. Other salts in Kruschen help to expel these dissolved crystals through the natural channels.

Interesting Old Town

History Of Cheddar Goes Far Back Into Forgotten Past

To most Canadians, "Cheddar" is synonymous with "cheese," and their interest in the word is very likely to end with their enjoyment of a golden-orange rabbit. But the resort village in Somersetshire, England, that gave its name to this delicious cheese is, itself, news worthy.

Situated on the Great Western Railway, about 28 miles from Bristol, (W. M. Venetian John Cabot and his son, Sebastian, sailed forth in 1497 on the great ship Matthew to discover the mainland of North America), Cheddar traces its history back into the forgotten past. According to C. M. Turner, general traffic manager of the Associated British and Irish Railways, its name is derived from the old Gaelic "Ced," meaning "prominent brow, or height," and "dw," meaning "water." Located on the River Ched, this ancient town has been said to be the living embodiment of the letter "C": cheese; of course, and cliffs; caves and caverns; and the Chasm; the Gothic church, and the 200-year-old market cross; cabbages, and cider—and even a cyclist's chalet!

The limestone hills to the east of Cheddar are pierced by the famous caves, with cliff rising sheer 450 feet above the river. Located Dry, Dry, the streams that flow in the limestone region are subterranean, honeycombing the hills with fantastic stalactite caves. Clothed for the most part in a growth of ivy, mountain ash, and yew, the Cheddar cliffs present the finest scene of this kind in the British Isles.

Visitors to Cheddar enjoy its narrow little streets and crooked lanes,

and the superb Gothic tower of St. Andrew's, in this village made famous

by Joseph Harding. Harding

was the farmer whose cheese-making

formula has become the model of

manufacturers the world over; a

model so perfect that Dickens, Dr.

Johnson, Thackeray, Goldsmith,

Fielding, and Sheridan, among count-

less others of lesser fame, have ex-

plained the merits of "Cheddar" in

song and story.

All Were Avoidable

The Ottawa Journal says there were 242 accidents at unprotected railroad crossings in Canada last year, causing 96 deaths and injuries to 300 persons—40 of the accidents occurring at crossings where there were protective devices. And every last one of the 242 could have been avoided if the drivers concerned had used caution and common sense.

World's Fair Stamp

The United States post office department issued a special three-cent stamp commemorating the New York World's Fair, to be placed on April 1, will be dark purple, will be about the size of a special delivery stamp. The central subject will be a modernistic representation of the trylon and perisphere at the fair.

"Have you heard the news? Jane

has married George Bennett."

"George Bennett! You can't mean it! Why, that's the man she was engaged to."

For instant ease from chest colds, ordinary sore throats.
